Do you have the actual document? Can you bring it to me on 9?

Enrique –

The PA/SI looked at data available at the time (2002-2003), and included collection of some new data (groundwater, surface water, sediment). The data did not show much of a release, if any, of contaminants from the landfill so the site did not score high and the conclusion was that listing on the NPL was not warranted.

I did not plan to attend the briefing.

Importance: High

I'm about to go into the 10 AM meeting with the RA. Are any of you attending? Is there additional material you can give me on the PA, etc?

Subject: Draft Laytonville Landfill Briefing Document

Amy, Alexis, Tomas, Enrique, and Jeff:

In preparation for a briefing with Mike on September 5 regarding Laytonville Landfill and the concerns raised in the Greenaction roundtable, please see attached. Land, Water, and Superfund have collaborated on this paper. At the briefing, I suggest we set out to cover the context, background, and summary with Mike, and have handy the remaining material to discuss if appropriate. If you have feedback on this document, we would be glad to receive it.

Tomas, Enrique, and Jeff can identify any key players from their divisions that might need to attend the actual discussion who are not yet included on that invitation. I copied here the cast of experts who collaborated on this document as a salute to their quick and thoughtful work on this complicated topic!

Cheers,

LE
